To Begin

The system may take up to 5 minutes to power up

After successful power up, you should see a home screen similar to this:
Quick Start Guide

*If the Zone 10 Touchscreen does not display ON/OFF buttons – then all control of the air-conditioning unit is done by the AC controller.*

*If your Zone 10 Touchscreen does have ON/OFF buttons, then:*

**On your air-conditioning unit controller:**

Perform your seasonal set-up by selecting your mode (e.g. COOL or HEAT), your temperature set-point, and if applicable set your fan speed

**On your Zone 10 Touchscreen:**

Perform your day-to-day operation of the system from your Zone 10 touchscreen

Press ON to turn the air-conditioning system on

Select the zones to condition, by pressing the zone name or by using the stylus (stored in the top right of the screen) to tap the square next to the zone name

Use the UP and DOWN arrows at the lower right corner of the screen to scroll to the next bank of 4 zone names

Use the sideways arrows next to each zone name to control the airflow to that zone
Getting Started

On your air-conditioning unit controller:

Select your mode (e.g. COOL or HEAT), set your temperature, and if applicable set your fan speed. You do not need to turn the air-conditioner on from this controller – your Zone 10 controller will do that for you.

Note: Setting very low temperatures on COOL mode, or very high temperatures on HEAT mode will not cool or heat your zones faster, but will cause your air-conditioner to run longer to achieve the target temperature, resulting in higher energy usage.

On your Zone 10 Touchscreen:

The system may take up to 5 minutes to power up. Once power up is complete, the home screen below should appear

- **LOUNGE**: 100%
- **KITCHEN**: 100%
- **MAIN BED**: 70%
- **ADAM**: 80%

Press ON to turn the air-conditioning system On

Press OFF to turn the air-conditioning system Off

Selecting Zones

A stylus has been supplied with your Zone 10 touchscreen to make screen taps easier – it can be found in the top right corner of your touchscreen – simply lift it out, alternatively, you can touch the screen with your finger.

To open or close a zone, tap anywhere along the name of the zone, or inside the square next to the zone name.

The first 4 zones in your system will be displayed on the first screen. To view more zones, press the down arrow in the lower right corner of the screen.
The airflow percentage to each zone is also displayed next to each zone, and can be adjusted by pressing the arrows on either side of the % number.

**Constant Zones**

Your Zone 10 system may set up with Constant Zones. These are pre-programmed zones that open up to relieve excess air pressure in your air-conditioning system if insufficient zones are open. Constant Zones are noted by a dash appearing in the square next to the respective zone name.

**Change Zone Names**

Your Zone 10 system allows for customisable zone names. Press Tools on the home screen to display the screen below:

```
CHANGE ZONE NAME
SET TIME AND DATE
AUDIO [OFF]
ADVANCED TOOLS
```

Press Change Zone Name to display the screen below:

```
LOUNGE [NAME]
KITCHEN [NAME]
MAIN BED [NAME]
ADAM [NAME]
```

```
BACK
```

```
CHANGE ZONE NAME
```
Press the NAME button of the zone you wish to name to bring up the on screen keyboard:

```
LOUNGE
L 2 3 4 5 6 7 8
9 0 A B C D E F
G H I J K L M N
O P Q R S T U V
W X Y Z , , DEL
```

Press the DEL key to remove characters, and add characters using the on screen keyboard

Press CANCEL to exit without changes, or press DONE when finished

**Change the Date and Time**

In the tools menu, press SET TIME and DATE to display the below screen:

```
YEAR 2010
MONTH DEC
DATE 31
DAY FRI
HOUR 5PM
MINS 00
```

Use the arrows on each side of the displayed values to adjust

When finished press DONE
Turn Sound on and Off

Turn the screen beeps on or off from within the tools menu by pressing the arrow on either side of the displayed audio value as shown below:

![Tools menu screenshot]

Presets

Up to 8 presets can be programmed into the Zone 10 system. A preset allows you to easily revert all or some of your zones to a favourite or commonly used setting.

To activate a preset, press the PRESETS button on the main screen:

![Preset screen]

NOTE: IF YOU HAVE A MyApp INTERFACE FOR CONTROL BY HANDHELD APPLE DEVICES, THERE IS NO PRESETS BUTTON, AS THE MyApp FEATURES ARE MORE INTUITIVE AND ARE NOT COMPATIBLE WITH THE STANDARD ZONE 10 PRESETS FUNCTION.

To display the below screen:
Press the preset button you wish to select.

To change a preset, press the CHANGE button, then press the button of the Preset you wish to change to display the below screen:

If you want to change the preset name press NAME and then type the name of the preset to one of your choice.

Select the desired zones configuration for this preset - for each zone, you have the option of OPEN, CLOSE, or N/A.

OPEN will open that zone when this preset is activated, CLOSE will close that zone when this preset is activated, and N/A will leave that zone unchanged when this preset is activated.

Use the scroll button to show Next/Previous zones.

When finished, press Done.

To return to the Main Screen, press Done.
Timers

Each preset can be scheduled to activate once per day on the weekdays, and individually on each day of the weekend.

From the Presets screen, press TIMER and the preset you wish to schedule:

- Open All
- Sleeping
- Summer
- Winter
- Morning
- Evening
- Weekend
- Studying

To display the below screen:

- Mon to Fri
- Start Time: 12:30 AM
- Stop Time: 12:15 AM

To activate on weekdays, press the box next to Mon to Fri. Set the Start and Stop times for this activation by using the arrows next to the H and M, beneath the corresponding time.

To activate on Saturday and/or Sunday, press the relevant box(es), and set Start and Stop times.

When finished press done.

If more scheduled activations are required, repeat above steps.

In the Presets menu, a bold border will appear around any preset that has scheduled activations.
21 Day Trial

Your Zone 10 system is has a 21 day trial feature, and if enabled, control of the system will be disabled after 21 days. Once disabled, you will need to contact the dealer you purchased the system from in order to obtain a 4-digit code that will enable you to resume operation of the system.

Enter 4-Digit Activation Code

After entering the 4-digit code, press DONE and the system will resume normal operation.

You may also enter an activation code at any time prior to expiry of the trial period.

To enter the code before the system is disabled, press TOOLS on the home screen.

When a 21 Day Trial feature has been enabled by your dealer, your system will display the button ACTIVATION CODE under the ADVANCED TOOLS button.
Then simply enter the code and press DONE

If the ACTIVATION CODE button is not present, then your system is already fully activated
Troubleshooting

If any problem is experienced, first reset the system. This can be done by:

- The reset button located along the bottom edge of the touch screen OR
- Turning the isolating switch on the outdoor air-conditioning unit off for 30 seconds, then turning back on again (ensure that this does turn off the power to the touch screen).

Also check:
If air volume control is fitted, then increase all zones to 100%
Check presets to see if any presets are programmed with timers
Check the unit controller for correct setting (heat/cool) and that the air-conditioning unit is operating correctly
If the above doesn’t help, contact the company you purchased the system through for further assistance
